

Nucleus Colony Order Form 2021

A nucleus colony (nuc) consists of five deep (9 ¼") frames of drawn comb in a ventilated cardboard shipping box, and the cost is \$195. The frames include drawn comb with a new laying queen, bees, brood, honey and pollen, enough to get your new colony off to a good start. These are very strong nucs with high-quality, well-mated queens. **I provide free telephone support if you have any questions or problems.**

The bees are usually ready in the first half of April. You can pick the nuc up at my home in Manchester. Nucs in deep or medium (6 ¼") frames may also be available in June if enough people want them.

Be sure to give me your complete contact information so I can reach you when your bees are ready. If I can't contact you, they go to the next person in line. They go out in the order in which they are paid, so payment (at least a 50% deposit) should accompany your order.
